The returning officer will fill all the required details to register the profile of the candidate in the system that will be used at multiple levels of conduct of election process. For all the received nominations, the returning officer needs to upload the affidavit against each nomination.

B. Candidate Scrutiny & Finalization Module

This system provides facility of marking nomination as Accepted/Rejected during scrutiny and marking of withdrawal if any candidate withdraws his/her candidature. After last date of withdrawal, the returning officer can also generate Form 7A through the system.

C. Election Permission Module

Permission module allows the election officials to process the permission request received by the candidates, political parties or any representatives of the candidate who applied the permission using SUVIDHA portal or submitted the permission request physically to election office.

(vii) Results Website and Results Trends TV: The timely publication of the round-wise information is vital for establishing a single source of data. The counting data entered by respective Returning Officers is available as 'Trends and Results' for public view through 'ECI Results website' <http://results.eci.gov.in/>. **The result website has been upgraded with enhanced features including map view for better user experience.**

The results are shown with the Infographics and displayed with auto-scroll panels through large display screens outside the counting hall or any public place through Trends TV. The trends & results are also available on ECINET under result section.

(viii) EVM Management System (EMS 2.0):

EVM Management System is designed to manage inventory of EVM units. One of the important modes to ensure a fair and transparent process in EVM management is the administrative protocol of the randomization of the machines before they are deployed in the Polling stations. The two-stage randomization is done in the presence of Political Parties'/candidates representatives.

(ix) Voters' Service portal:

Through <https://ecinet.eci.gov.in/>, an elector can avail and

access various services such as access the electoral list, apply for voter id card, apply online for corrections in voter's card, track form status, view details of Polling booth, Assembly Constituency and Parliamentary constituency, and get the contact details of Booth Level officer, Electoral Registration Officer among other services.

(x) ECINET App: Citizens can avail and access various services such as apply for voter id-card, corrections in Voter's ID Card, view details of Polling booth, Assembly Constituency and Parliamentary Constituency, and get the contact details of Booth Level officer, Electoral Registration Officer among other services. The ECINET will also provide access to the various Stakeholders of ECI to provide input and get the information depending on the assigned roles and responsibilities. ECINET App can be downloaded from Google Play Store and Apple App Store. They can also "Book A Call" with their BLO for any query/grievance.

(xi) Divyang (Saksham) Module of ECINET: Divyang (Saksham) Module of ECINET is meant for Persons with Disabilities. PwD electors can make requests for marking them as PWD, request for new registration, request for migration, request for correction in EPIC details, request for wheelchair, Pick & Drop facility, assistance, register a complaint etc. It utilizes the Accessibility features of mobile phones for voters with blindness and hearing disabilities.

(xii) BLO Module under ECINET: BLO module is a dedicated module for BLOs under ECINET App for performing their tasks digitally. Following are the main features of this module:

- a. Checklist/Field Verification of Forms;
- b. Collection of details of Assured Minimum Facility (AMF) and Extended Minimum Facility (EMF) at polling stations;
- c. Capturing of GIS co-ordinates of Polling Stations;
- d. Update of Photos of Polling Stations;
- e. Form Submission on behalf of Electors;
- f. House to House Verification through online BLO Register.
- g. Digitize Enumeration Form
- h. Verify electors and upload supporting documents for SIR

(xiii) Electoral Roll module of ECINET Portal (previously ERONET):

- This module is a web-based system for around 10 lakh Electoral officials, in 14 languages and 11 scripts, to handle all processes pertaining to Form 6/6A/7/8.
- It standardizes forms processing, standard database scheme, and a standard template for E-Roll printing.
- It automates the process of electoral roll management starting from elector registration, field verification of electors, decision support system for Electoral Registration Officers and for providing extensive integrated value-added services.
- All 28 States and 8 UTs are sharing common infrastructure at National Level. The URL of the platform is <https://ecinet.eci.gov.in/>

(xiv) Service Voter Portal: The Service Voter Portal is a web-based application for registration of service electors. In India, there are more than 19 lakh registered service voters in the system. The service voter registration process is different from the general electors. The responsibility of enrollment of a service voter is given to the Record Officer of that service voter. The record office ensures the filling of forms and uploads the XML in the required format on the Service Voter portal. Thereafter, EROs are responsible to enroll the service electors following the due process. The URL of system is <https://svp.eci.gov.in/>

(xv) Electronically Transmitted Postal Ballot Management System (ETPBMS) for Service Voter: The upgraded version of ETPBS is having enhanced features and Dashboard & Reporting modules for all stakeholders.

The system is used to generate and transmit Postal Ballot through Electronic means to the Service Voters. The system has also been integrated with Department of Posts so that Service voter can send his/her Ballot after casting vote, through speed post without paying any charges.

Detailed instructions are sent, along with Postal Ballot, to each service elector. On the day of counting, the same system will be used to validate the Postal Ballot received by post to verify whether the received *ePostal Ballot* is generated by the system or not.

The Postal ballots sent to service electors electronically are called Electronically Transmitted Postal Ballots (ETPBs). The return of ETPB is

through postal services. Earlier, the envelopes for postal ballot were forwarded by the CEO to the Record Officers in order to dispatch polled ETPBs by the service voters through post. Now, the Commission has decided that the CEOs are not required to send envelopes to the Record Officers for this purpose.

The Record Officer/Unit Officer/Commandant or any other competent authority, as the case may be, shall procure the envelopes and provide them to the Service Voters for dispatching their polled ETPBs to the respective Returning Officers. The URL of system is <https://etpbms.eci.gov.in/>

(xvi) National Grievances Services Portal: The Election Commission has developed a National Grievance Service Portal (NGSP). This system is developed in such a manner that in addition to providing redress to the complaints of the Citizens, Electors, Political Parties, Candidates, Media and Election Officials at National, State and District level, it also serves as a common interface for providing services.

The application provides for a single interface for handling complaints by the Election officials. All Electoral Officers, District Election Officers, CEOs and ECI Officials are part of the system. Thus, issues are directly assigned to the respective user upon registration. The citizen can use this service using <https://ngsp.eci.gov.in/>

(xvii) Election Seizure Management System (ESMS) module of ECINET: In order to ensure free and transparent elections, Election Commission of India has embedded technology into the monitoring process through the Election Seizure Monitoring System (ESMS) module of ECINET Mobile App which is proving to be a catalyst, as it brings a wide array of Central and State enforcement agencies together for better coordination and intelligence sharing.

App is being used to digitize data for intercepted/Seized items (Cash/Liquor/Drugs/Precious Metal/Freebies/Other Items) direct from field. This enables stakeholder to get automated desired reports in required format; avoid duplicate data entry by Agencies and do analysis on received data at CEO Level.

(xviii) Integrated Election Expenditure Monitoring System (IEMS):

Integrated Election Expenditure Monitoring System (IEMS) is a user-friendly, secure online platform which enables Political Parties to

submit online prescribed document like Contribution report (Form 24A), Annual Audit Account, Election Expenditure. Key features for IEMS are as follows:

- Email/SMS based alerts/acknowledgements to increase compliance;
- Aadhaar based e-Sign.

(xix) Observer Portal:

➤ Observer portal under ECINET is an online portal for data management of all types of observers i.e. general observer, police observer and expenditure observers.

➤ The deployment schedule of the observer, report submission and many other activities are completed with the help of this portal. The observers also get multiple facilities like filling & submission of reports, notification from the Commission, downloads of all the required documents and many more. ➤ This app helps capture near real-time voter turnout data under PRO module and is used by the ECI, CEOs, DEOs, and ROs to closely monitor polling progress across constituencies. It ensures the timely, accurate, and efficient dissemination of poll percentage data to all stakeholders, thereby supporting effective decision-making,

transparency, and smooth conduct of the electoral process.

35. Electronic Voting Machines (EVMs) and Voter Verifiable Paper Audit Trail (VVPATs):

(i) EVMs and VVPATs: The Commission shall deploy Voter Verifiable Paper Audit Trail (VVPAT) along with Electronic Voting Machine (EVM) at every polling station in the General Elections to Legislative Assemblies in States of Assam, Kerala, Tamil Nadu, West Bengal and UT of Puducherry to enhance the transparency and credibility of the election process as VVPAT allows the voters to verify their vote. Arrangements have already been made to ensure availability of adequate number of EVMs and VVPATs for the smooth conduct of election.

(ii) Awareness on EVM and VVPAT: Extensive awareness on EVMs has been conducted for the general public across all polling locations through Mobile Demonstration Vans(MDV) and at DEO/RO Offices through EVM Demonstration Centers(EDC) including casting of mock poll by them. Digital outreach for awareness on use of EVMs and VVPATs will be continued.

(iii) Randomization of EVMs and VVPATs: EVMs/VVPATs are randomized twice using "EVM Management System (**EMS 2.0**)" while being allocated to an Assembly Constituency and then to a polling station, ruling out any pre-fixed allocation. The First Randomization of EVMs and VVPATs is conducted by the District Election Officer to allocate the units Assembly Constituency wise in the presence of the representatives of the recognized political parties. The lists containing unique IDs of machines are shared with them. After finalization of list of the Contesting Candidates, the Second Randomization of EVMs and VVPATs will be conducted by the Returning Officer to allocate the units polling station-wise in the presence of the contesting candidates or their representatives. Lists of randomized EVMs/VVPATs are also shared with contesting candidates.

(iv) Commissioning of EVMs and VVPATs: After finalization of list of the Contesting Candidates and Second Randomization of EVMs and VVPATs, the commissioning (candidate setting) of EVMs and VVPATs is done in the presence of the Contesting Candidates or their representatives. TV/Monitor will be installed in commissioning hall for simultaneous viewing of symbol loading in VVPATs by Candidates or

their representatives for greater transparency. After commissioning (candidate setting) of EVMs and VVPATs in every EVM and VVPAT, mock poll with one vote to each Candidate including NOTA is done. Additionally, mock poll of 1000 votes is conducted in 5% randomly selected EVMs, as well as VVPATs. The electronic result is tallied with paper count. Candidates or their representatives are allowed not only to select 5% machines randomly but also to do mock poll themselves.

After commissioning of EVMs and VVPATs, Symbol Loading Units (SLU) will be sealed and kept under the custody of the District Election Officer concerned till Election Petition period. Only reserve SLU (not used for symbol loading) will be returned back to the authorized BEL/ECIL engineer on P+1 Day. In case of Election Petition, used SLUs will be kept till final disposal of Election Petition.

(v) GPS tracking of movement of EVMs and VVPATs: The Commission has instructed the Chief Electoral Officers of all State/UTs that end-to-end movement of all EVMs and VVPATs including reserve shall be carefully monitored at all times, for which any vehicle carrying EVMs and VVPATs shall mandatorily be fitted with GPS tracking system.

(vi) Mock Poll on Poll Day:

A. On poll day, 90 minutes before start of actual poll, mock poll is conducted by casting at least 50 votes ensuring that votes are recorded for each of the contesting candidates including **NOTA** at every polling station, in the presence of polling agents of the candidates and the electronic result of the Control Unit and the VVPAT slips count are tallied and shown to them. A certificate of successful conduct of mock poll shall be made by the Presiding Officers in Presiding Officer's Report.

B. Immediately after mock poll procedure, the CLEAR button on Control Unit (CU) is pressed to clear the data of the mock poll and the fact that no votes are recorded in the CU, is displayed to the Polling Agents present in the polling stations. The Presiding Officer also ensures that all mock poll slips are taken out from the VVPAT slip compartment, stamped as "MOCK POLL SLIP" and kept in separate sealed black envelope before the start of actual Poll.

C. After mock poll, EVMs and VVPATs are sealed in the presence of polling agents and signature of polling agents are obtained on seals,

before starting actual poll.

(vii) Poll Day and Storage of polled EVMs and VVPATs at Strong Rooms:

A. After completion of poll, Presiding Officer shall press the "CLOSE" button of the Control Unit of the EVM so that no further vote can be cast. EVMs and VVPATs are sealed in the respective carrying cases in the presence of polling agents and signature of polling agents are obtained on seals.

B. After close of poll, a copy of Form-17C Part-I having details of total polled votes, seals (unique number), serial numbers of EVMs and VVPATs used in polling stations is provided to polling agents of candidates, present at the polling station at the close of poll.

C. Polled EVMs and VVPATs are escorted back to the strong room for storing in double lock system in the presence of candidates/their representatives under videography. Candidates/Polling Agents are also allowed to follow the vehicles carrying polled EVMs and VVPATs from polling stations to Reception Centre for the purpose of storing in the Strong Room.

D. Candidates or their representatives can also camp in front of the strong room. These strong rooms are guarded 24x7 in multilayers, with CCTV coverage facilities.

(viii) Counting of Votes at Counting Centers:

A. On the day of counting, strong room is opened in the presence of Candidates, their authorized representatives, RO/ARO and ECI Observer under videography.

B. Only Control Units of the polled EVMs are brought to the Counting Hall(s) under security, under CCTV coverage and in the presence of Candidates or their agents.

C. Round-wise CUs are brought to the counting tables from Strong Rooms under continuous CCTV Coverage.

D. On the counting day, before retrieving the result from the Control Units, the seals are verified, and unique serial number of CU is tallied before the counting agents deputed by the candidates.

E. During counting, Counting Agents can verify the polled votes displayed on CU with that entered in Part-1 of Form-17C. Candidate-wise polled votes are recorded in Part-II of Form-17C and signature of

counting agents are obtained thereof.

F. The penultimate (second last) round of EVM counting shall not be taken up until the counting of postal Ballot Papers is completed at the counting center. This will be applicable only at the counting centers where Postal ballot Paper counting is being done.

G. VVPAT Slips will be counted in case of non-deletion of mock poll data from Control Unit (CU), non-removal of mock poll slips from VVPAT or mismatch between votes recorded in Control Unit and Part-1 of Form 17C. CUs of such polling stations will be set aside during regular counting; their tables will remain vacant. After all regular rounds of counting through Control Units are completed, VVPAT slips from these stations will be counted at the VVPAT Counting Booth. Each VVPAT count is treated as a separate round of counting and candidate-wise votes obtained from VVPAT slips count of all these polling stations shall be added to the candidate-wise tally and the final result compiled.

H. EVMs & VVPATs are stored back in Strong Room in the presence of candidates/their representatives till the completion of the Election Petition period.

(ix) Mandatory Verification of VVPAT Paper Slip:

In pursuance of the Hon'ble Supreme Court of India's Order dated 8th April, 2019, the Commission has mandated VVPAT slips count of Five (5) randomly selected Polling Stations in each Assembly Constituency or Segment of the Parliamentary Constituency of the State/UTs by the Returning Officer, by draw of lots in presence of candidates/their counting agents & ECI Observer, for verification of the result obtained from the Control Unit. (x) None of the Above (NOTA) in EVMs, VVPATs and Postal Ballot:

As usual, there will be 'None of the above' option for the electors. On the BUs, below the name of the last candidate, there will be a button for NOTA option so that voters who do not want to vote for any of the candidates can exercise their option by pressing the button against NOTA. Similarly, on Postal Ballot Papers there will be a NOTA Panel after

the name of the last candidate. The symbol for NOTA as given below will be printed against the NOTA Panel.

As part of the SVEEP, there are awareness programs to bring this option to the knowledge of electors and all other stakeholders.

(xi) Photographs of Candidates on EVM Ballot Paper:

Earlier the candidate's photographs were printed in black and white on the EVM ballot unit for identifying the candidates. Now, ECI has decided to print the color photograph of the candidates on the EVM ballot unit. It has also been prescribed that candidate's face will occupy three-fourths of the photo space for better visibility. Serial numbers of candidates/NOTA will be printed in the international form of Indian numerals. The font size of serial number will be 30 and in bold for greater clarity. Further, to ensure uniformity, the names of all candidates/NOTA will be printed in the same font type and font size large enough for easy readability.
